MARINE CORPS.

For pay and subsistence of officers of the marine corps, and for pay of non-commissioned officers, musicians, privates, and others of the corps, seven hundred thousand dollars.

For provisions, one hundred and twenty thousand dollars.

For clothing, one hundred and sixteen thousand eight hundred and nineteen dollars.

For fuel, twenty six thousand one hundred and sixty nine dollars.

For military stores, namely: For pay of mechanics, repair of arms, purchase of accoutrements, ordnance stores, flags, drums, fifes, and other instruments, twelve thousand dollars.

For transportation of officers and their servants, and troops, and for expenses of recruiting, twelve thousand dollars.

For repairs of barracks, and rent of offices, where there are no public buildings, ten thousand dollars.

For contingencies, namely: Freight, ferriage, toll, cartage, wharfage, purchase and repair of boats, labor, house rent of officers' quarters, burial of deceased marines, printing, stationery, postage, telegraphing, apprehension of deserters, oil, candles, gas, repairs of gas and water fixtures, water rent, forage, straw, barrack furniture, furniture for officers' quarters, bed sacks, wrapping paper, oil cloth, crash, rope, twine, spades, shovels, axes, picks, carpenters tools, keep of a horse for the messenger, repairs to fire engines, purchase and repair of engine hose, purchase of lumber for benches, mess tables, bunks, repairs to public carryall, purchase and repair of harness; purchase and repair of handcarts and wheelbarrows, scavengering, purchase and repair of galleys, cooking stoves, ranges, stoves, where there are no grates, gravel for parade grounds, repair of pumps, brushes, brooms, buckets, paving, and for other purposes, forty thousand dollars: Provided, That the amount of fifty thousand dollars appropriated by section nine of an act making appropriations for the legislative, executive, and judicial expenses of the government for the year ending the thirtieth of June, eighteen hundred and seventy, to be expended under the direction of the President in organizing and sending out an expedition to the north pole, shall not be carried to the surplus fund or covered into the treasury until the purpose of said appropriation shall have been completed, but may be applied to expenses of said expedition incurred during any subsequent year that said expedition may be engaged on its duties.

SEC. 2. That the Secretary of the Navy is hereby authorized to have built, by contract in some private yard, a floating iron dock, for the repair of naval vessels on their stations, and a sum not exceeding one million dollars is hereby appropriated for this purpose. And the said contract shall only be made to the lowest responsible bidder, and on plans and specifications which shall be open for the inspection of bidders for at least ninety days before the day of letting said contract, after the public notice by advertisement for at least thirty days in at least one daily newspaper published in each of the cities of Boston, New York, and Philadelphia, inviting sealed bids for such contract, which bids shall be opened and the award of the contract made publicly by the Secretary of the Navy, at a time and place to be specified in such notice. And no contract shall be made for a dock under this section at a cost exceeding one million dollars: Provided, That if it be thought best by a board consisting of chiefs of the bureaus of "Construction and Repairs," "Steam Engineering," and "Yards and Docks," that plans and specifications shall be invited from responsible builders, engineers, and others outside of the Navy Department, the Secretary of the Navy may, by public advertisement, as provided in this section, advertise for such plans and specifications to accompany bids for the construction of the dock according to the same; in which case the Secretary of the Navy shall refer all such plans and specifications and bids and the bids on the plans furnished by the department to a board of at least five experienced officers, a majority of whom shall be constructors and engineers, and one of whom may be an experienced civilian engineer, who shall consider and report which of all the bids is the lowest for the purposes of this contract, taking into consideration the plans and specifications on which they are respectively made: Provided, however, That if the contract shall be awarded upon plans and specifications furnished by persons outside of the department, such contract shall not be entered into unless the contractor shall furnish good and sufficient security in at least five hundred thousand dollars, in addition to the reservations on said contract, that the dock, when completed, shall be portable and safe, and shall in all respects answer the purposes for which it was built.

SEC. 3. That no chief of a bureau shall make any contract for supplies for the navy, to be executed in a foreign country, except it be on first advertising for at least thirty days in two daily newspapers of the city of New York, inviting sealed bids for furnishing the supplies desired, which bids shall be opened in the presence of the Secretary of the Navy, and the heads of two bureaus; and contract shall in all cases be awarded to the lowest bidder; and paymasters for the navy on foreign stations shall render, when practicable, with their accounts, for settlement, an official certificate from the resident consul, commercial, or consular agent of the United States, if there be one, to be furnished gratuitously, vouching that all purchases and expenditures made by said paymasters were made at the ruling market prices of the port or place at the time of purchase or expenditure.

SEC. 4. That the President be, and he is hereby, authorized to accept the resignation of any officer in the navy until the number of officers in the grade to which such officers shall belong is reduced to the number authorized by law, whose resignation shall take effect on or before the first day of January next, and any officer so resigning shall be entitled to one year's sea pay in addition to the pay due such officers at the date when his resignation shall take effect: Provided, That this section shall not apply when the number of officers shall have been reduced to the number allowed by law.

SEC. 5. That the officers of the medical corps on the active list of the navy shall be as follows:

Fifteen medical directors, who shall have the relative rank of captain.

Fifteen medical inspectors, who shall have the relative rank of commander; and

Fifty surgeons, who shall have the relative rank of lieutenant commander or lieutenant; and each and all of the above named officers of the medical corps shall have the pay of surgeons in the navy as now provided; and medical directors and inspectors, on duty at sea, shall receive the pay of fleet surgeons.

One hundred assistant surgeons, who shall have the relative rank of master or ensign, with the present pay of assistant surgeon in the navy: Provided, That assistant surgeons of three years' service, who have been found qualified for promotion by a medical board of examiners, shall have the pay of past assistant surgeons, as now provided; and passed assistant surgeons shall have the relative rank of lieutenant or master; and no person under twenty one, or over twenty six years of age, shall hereafter be appointed an assistant surgeon in the navy.

PAY CORPS.

SEC. 6. That the officer of the pay corps on the active list of the navy shall be as follows:

Thirteen pay directors, who shall have the relative rank of captain.

Thirteen pay inspectors, who shall have the relative rank of commander; and

Fifty paymasters, who shall have the relative rank of lieutenant commander or lieutenant.

And each and all of the above named officers of the pay corps shall have the pay of paymasters in the navy as now provided; and pay directors and inspectors on duty at sea shall receive the pay of fleet paymaster.

Thirty passed assistant paymasters, who shall have the relative rank of lieutenant or master, with the pay of passed assistant paymasters in the navy as now provided.

Twenty assistant paymasters, who shall have the relative rank of master or ensign, with the pay of assistant paymasters as now provided: Provided, however, That all laws and regulations relating to the bonds of paymasters shall continue in full force and application, and the issuing of a new appointment and commission to any officer of the pay corps under the provision of this act shall not effect or annul any existing bond, but the same shall remain in force, and apply to such new appointment and commission.

ENGINEER CORPS.

SEC. 7. That the officers of the engineer corps on the active list of the navy shall be as follows:

Ten chief engineers, who shall have the relative rank of commander; and

Forty five chief engineers, who shall have the relative rank of lieutenant commander or lieutenant.

And each and all of the above named officers of the engineer corps shall have the pay of chief engineers of the navy as now provided.

One hundred first assistant engineers, who shall have the relative rank of lieutenant or master; and

One hundred second assistant engineers, who shall have the relative rank of master or ensign; and the said assistant engineers shall have the pay of first and second assistant engineers of the navy, respectively, as now provided.

SEC. 8. That no person under nineteen or over twenty-six years of age shall be appointed a second assistant engineer in the navy; nor shall any person be appointed or promoted in the engineer corps until after he has been found qualified by a board of competent engineer and medical officers designated by the Secretary of the Navy, and has complied with existing regulations.

SEC. 9. That of the naval constructors two shall have the relative rank of captain, three of commander, and all others that of lieutenant commander or lieutenant; and assistant naval constructors shall have the relative rank of lieutenant or master; four chaplains shall have the relative rank of captain, seven that of commander, and not more than seven that of lieutenant commander or lieutenant; and that the President of the United States is hereby authorized, in his discretion, to determine and fix the relative rank of civil engineers: Provided, That the pay of said officers shall not be increased.

SEC. 10. That the foregoing grades, hereby established for the staff corps of the navy, shall be filled by appointment from the highest numbers in each corps, according to seniority, and that new commissions shall be issued to the officers so appointed, in which commissions the titles and grades herein established shall be inserted; and no existing commission shall be vacated in the said several staff corps, except by the issue of new commissions required by the provisions of this act, and no officer shall be reduced in rank or lose seniority in his own corps by any change which may be required under the provisions of this act; and the officers of the staff corps of the navy shall take precedence in their several corps, and in their several grades, and with officers of the line with whom they hold relative rank, according to length of service in the navy: Provided, That in estimating the length of service for this purpose, the several officers of the staff corps shall respectively take precedence in their several grades and with those officers of the line of the navy witn whom they hold relative rank who have been in the naval service six years longer than such officers of said staff corps have been in said service: And provided further, That in estimating such length of service, officers who have been advanced or lost numbers on the Navy Register shall be considered as having gained or lost length of service accordingly: And provided further, That chiefs of bureau may be appointed from officers having the relative rank of captain in the staff corps of the navy on the active list: And provided further, That no staff officer shall, in virtue of his relative rank or precedence, have any additional right to quarters: And provided further, That any staff officer of the navy who has performed the duty of chief of a bureau of the Navy Department for a full term shall thereafter be exempt from sea duty, except in time of war.

SEC. 11. That officers of the medical, pay, and engineer corps, chaplains, and professors of mathematics, and also constructors, who shall have served faithfully for forty-five years, shall, when retired, have the relative rank of commodore; and officers of these several corps who have been or shall be retired at the age of sixty-two years, before having served for forty-five years, but who shall have served faithfully until retired, on the completion of forty years from their entry into the service, shall also from that time have the relative rank of commodore; and staff officers who have been or shall be retired for causes incident to the service before arriving at sixty-tho years of age shall have the same rank on the retired list as pertained to their position on the active list: Provided, however, That nothing contained in this section shall be construed to increase the pay now provided for said several staff officers.

SEC. 12. That the chiefs of the Bureau of Medicine and Surgery, Provisions and Clothing, Steam Engineering, and Construction and Repair, shall have the relative rank of commodore while holding said position, (or if heretofore or hereafter retired therefrom by reason of age or length of service,) and shall have, respectively, the title of Surgeon General, Paymaster General, Engineer-in-Chief, and Chief Constructor: Provided, That when the office of chief of bureau is filled by a line officer below the rank of commodore, said officer shall have the relative rank of commodore during the time he holds said office: And provided further, That the pay of chiefs of bureau in the Navy Department shall be the highest pay of the grade to which they belong, but not below that of commodore; and officers of the staff now on the retired list shall have the rank thereon to which they would have been entitled had they remained in the active list, unless they shall be entitled to higher rank. That commanding officers of vessels of war and of naval stations shall take precedence over all officers placed under their command, and the Secretary of the Navy may, in his discretion, detail a line officer to act as the aid or executive of the commanding officer of a vessel of war, or naval station, which officer shall, when not impracticable, be next in rank to said commanding officer, and who, as such aid or executive, shall, while executing the orders of the commanding officer, on board such vessel, or at such station, take precedence over all officers attached to such vessel or station; and all orders of such aid or executive shall be regarded as proceeding from the commanding officer; and such aid or executive shall have no independent authority in consequence of such detail; and staff officers, senior to the officer so detailed, shall have the right to communicate directly with the commanding officer, and in processions on shore, on courts martial, summary courts, courts of inquiry, boards of survey, and all other boards, line and staff officers shall take precedence according to rank.

SEC. 13. That all acts and parts of acts inconsistent with this act are hereby repealed.

Approved, March 3, 1871.

The bill forbidding the sale of liquor on election days was not passed by the Senate and signed by the Governor, as reported, and is not a law. It appears that the bill was never taken out of the hands of the Senate committee, to whom it was referred, and hence was not finally acted upon.

HUNTINGDON, PENN'A.

Wednesday Morning, June 21, 1871.

REPUBLICAN STATE TICKET.

FOR AUDITOR GENERAL:
COL. DAVID STANTON, of Beaver.
FOR SURVEYOR GENERAL:
COL. ROBERT B. BEATH, of Schuylkill

EDITORIAL EXCURSION.

A High Old Time.

Our readers will be surprised to hear that we have been off of duty, on a romp up to York State, for four or five days. It is even so! We didn't want to tell you until we returned lest you might be disposed to interfere with our pleasure. The truth is we wanted to have a good time generally, and *we had it*. And for fear you might now feel inclined to complain of us, we will tell you all about it, if you will only listen. Put on your sober caps and don't smile even the faintest shadow, until we are through, because it is going to be a long story; a very *sober* and serious one, we fear, and desperately truthful; so compose yourselves, close your eyes, mouths and open your ears. There! that will do! Now, then!

There is in this State what is known as THE PENNSYLVANIA EDITORIAL ASSOCIATION. H. G. Smith, of the Lancaster *Intelligencer*, is the President, and R. S. Mennamin, of the Philadelphia *Printers' Circular*, is the Secretary, thereof. It is the duty of the first named gentleman to make all the buncombe speeches for the Association, which it is necessary to make from time to time, to preside at banquets, and smile most approvingly upon the boys, and he performs his duties well, while the latter superintends the getting up of the re-unions, sends out invitations, secures free passes, contracts with hotel-keepers, sees that everybody is made comfortable, answers everybody's questions, smiles most approvingly, and must be as even-tempered as a lamb. His duties are onerous, but he is the right man in the right place. This is the universal verdict. He can count upon our vote for the position until it will no longer count, if he wants it.

This latter good gentleman sent us an invitation to be present at a Summer-meeting of the Association, to be held at Williamsport, on the 14th inst., and after consulting our pocket-book, and finding that it would only cost a trifle, about seven dollars a head, we concluded that we could borrow that much at sixty days, if our patrons didn't come to time, and determined to go. Our better half hesitated for a week or two, said she wouldn't go, but the last hour found her ready, and she went along to take care of us, she said, but we really think that the care was the other way. We may tell some severe things on her before we get through, but we don't expect our readers to tell her, and she will never see the JOURNAL, because she lives up at Bedford, and thinks it is the greatest place this side of sun down. It is a good quiet place for one who desires to go into retirement, but for us give us Huntingdon or give us—another Editorial Convention!

Tuesday morning at 5.40, in company with Bro. Lutz, of the Bedford *Inquirer*, and his most excellent lady, we found ourselves ready to take the "Local Freight" for Tyrone. This train is a little mixed. It runs by fits and starts. It is not remarkable for speed, but is excellent on a stop. Stations are not of as much importance to it as sidelings. It has a great desire to take up all the cars that may be standing along the way, and this takes up time. A good lady in our hearing said it was "very pokey." Mr. Lowe, the conductor, a very clever gentleman, may think it a very clever thing for *Lowe*, but we would prefer some other train for high.—The "Local" was a little behind time, and "you know how it is yourself" when you are ready and the cars are late. We got fidgety. We like to be on time and we expect the cars to be. At last "all aboard" came to cheer us into the car and we went rolling up through old mother Huntingdon, bidding good-bye to the Morrison, Exchange, and Jackson hotels, the three great rivals for the entertainment of the public, past Henry & Co.'s store, Burchinells' planing mill, West Huntingdon, the Keystone shoe factory, the Franklin planing mill, spinning along the banks of the "raging canawl," looking up at the high bluff and admiring its robe of green on the right, and the "blue Juniata" placidly rolling along, with its banks covered with the most magnificent shrubbery on the left, until we reached Petersburg, the first station out. Petersburg is a flourishing village, but as soon as the necessary shifting could be done we were off again to the next sideling, and there appeared to be a sideling every mile or two—at Barree, at Spruce Creek, at Birmingham, all flourishing villages, there was work for the "Local," and judging from the time it took, it did it well. The *Inquirer* suggested when next he rode on that train he would bring his fishing tackle along and fish between runs. After this huge joke the *Inquirer* remained solemn and silent—it was enough for one day. We felt alarmed in the tunnel lest our better half might attempt to commit an assault and battery upon us, after the manner of loving young people, but there was no necessity for the alarm, she didn't. We crossed Spruce Creek just thirty-two times, by actual count, and every time landed on the same side. It is the most one sided stream we ever saw. We have often wondered where nursery men procured their nice cone and funnel-shaped spruce and other pines, but our custodian—beg pardon—our better half—pointed out the secret and all was explained. They are got up Spruce Creek! The finest varieties to be found anywhere are in abundance here. Well, well; we passed the Keystone Zinc Works, now standing idle and looking as if in rapid decay. Why are they idle? A long whistle, the brakes were plied and Tyrone was announced.

Mr. Lowe, our gentlemanly conductor, informed us that the Lock Haven train would leave at 8.40, and we put in the time lounging about the depot until that train was ready to leave. The Harrisburg Accommodation brought down a number of the editorial fraternity who joined us, and at the time stated we pulled out for Lock Haven. Among those who joined us at this place were Sansom, of the Indiana *Democrat*, McPike, of the Cambria *Freeman*, Henry, of the Kittaning *Republican*, and Durben, of the New Castle *Courant*. There were also a large number of Democratic editors on board bound to Bellefonte, to attend the Democratic Editorial Convention, with whom we were unacquainted. The Bald Eagle Valley railroad traverses a region that is not remarkable for fertility or picturesque scenery—it is, to some extent, a lumber region. We noticed Bald Eagle and Mount Eagle stations, but we didn't see any bald eagles or any eagles mount. There was scarcely anything to attract the attention until we reached Milesburg. We saw the ruins of at least three old furnaces, which indicated that the manufacture of iron had given way to something more lucrative.

At Milesburg we were switched off to Bellefonte, where we arrived a few minutes later. Here our Democratic brethren bid us good-bye. The Indiana *Democrat* remarked that they would meet us on Wednesday, when the water and wine would mingle, but for the present the wine must bid us adieu, so the adulterated wine left us and the pure water went on. We backed out of Bellefonte as soon as possible to Milesburg and again resumed our journey. Bellefonte, judging by what we saw of it, is a very handsome place, and it would have given us great pleasure to have spent several hours here. Nothing of interest occurred, except the killing of a cow, until we reached Lock Haven, a lumber town on the P. & E. R. R. Here we were met by a train down from Erie and taken on board, without entering Lock Haven, and taken on down the road to Williamsport. The country along the West Branch is open and very fertile. The wheat appeared to be very fine and gives promise of a very heavy yield. On we went, skimming along through splendid farms, over little rivulets, on the margin of the river, under overhanging cliffs, through heavy cuts and past fine edifices the later giving evidence of thrift and culture. Williamsport with is great Boom, its scores of mills, its square acres of lumber, its splendid church and other edifices, its magnificent residences, and its Herdic House came into view. Down went the brakes and the great throng poured out of the cars to enter the greater throng already at that tower of babel. The crowed swayed to the clerk's counter and the register was in demand for the next fifteen minutes, and strange scrawls found their way there. We were consigned to No. 83. A porter hunted it up for us, and a good long hunt he had, but he found it, and to our mortification it over-looked the hollow square in that immense building. Four high walls with windows and the sky were the only visible objects. Our better half insisted that there were only eighty-four windows to be seen, while we counted them five times over and could not get less than four hundred and twenty. We counted them over for hours—it was all we had to do. We undertook to count the brick but they were too many for us. If we can arrange to have Messrs. Schofield & Barry visit Huntingdon we will secure a splendid back room for them where they can put in their time counting the windows and brick! Oh, it will be so pleasant!

Dinner over at the Herdic, with the *Inquirer* and lady in company, we took the street car and rolled over the splendid Nicholson pavement, made of pieces of plank set on end, down by some of the finest residences in the State, to the City Hotel, where our friends left us to run down the town, while we continued on to Dickinson Seminary. This institution is one of the most noted in the State. It is now under the control of the Rev. Lee Spottswood. Four hundred students can be accommodated. There are about one-third this number attending at present. The summer session is never so well attended. Here we saw Miss Maggie Shoemaker and Miss Amanda Mortimore and Mr. Will Jordan, of Bedford, whom we were very much gratified to meet They speak very highly of the institution and have a very high regard for their preceptors. We spent an hour or more looking in upon the flower gardens and beautiful lawns surrounding the residences of the wealthy. Accidently we came upon the residence of our mutual friend, Mr. George Sigafoos, and his splendid lady, formerly of Bedford, and we were in for it. And they live at home up in that beautiful, youthful city! Everything to hand and a magnificent octagonal residence, splendidly furnished, would make most anybody feel at home! We hope you may both long live to enjoy your pleasant comforts.

On Wednesday morning, at 10 o'clock, the whole party, by previous arrangement, were on hand to take a boat ride up the West Branch through the celebrated Boom. The ladies were taken to the river in carriages while most of the gentlemen proceeded on foot, a distance of two-third's of a mile. Here three small steamers had been prepared, by Peter Herdic, the prince of Enterprise, for our reception. A large majority of the ladies were comfortably quartered on board of the "Minnie" and "Maggie" and the gentlemen on a larger vessel. "All aboard!" and the ropes were loosened, the signal for starting whistled and the different boats skimmed out upon the breast of the tranquil West Branch. The Mayor, Peter Herdic and other distinguished persons accompanied the excursion. The weather was delightful. The sun now and then passed from under a cloud and made it rather hot for frail mortals, but in the kindness of his heart old Sol would slip in again and relieve us from his scorching rays. We were told that there were no logs in the Boom before we visited it, and we really think that there were not over a million; but a million, we suppose, is only six small ciphers in comparison with what the Boom can contain. The Boom is a big thing; it is not, as some suppose, the distant report of a big gun. Though several big guns are interested in it. It is a kind of a big pocket, formed by chaining logs together and fastening them up to piers built of logs and stone, in the river, where all the logs that come down the river in freshets, are caught, and the owner, who has a private mark on each log, is charged for pocketing it. It is intended to pocket logs and in time the Company pockets money for the use of their pocket. It is all a *log*-arithm to us. Millions of logs are caught and sawed out of this Boom every year.

The banks of the river were covered with green trees, after leaving the mills, with here and there a farm house, forming most picturesque landscapes at intervals. As we passed along we noticed, on our right, a solitary log, in a distance of a mile, while on our left thousands were in the Boom. How this one had escaped, we have no idea, but there it lay all alone in its glory. We pitied it. It appeared to be out of water. It was in the wrong pew; it ought to have been in the pocket. We steamed eight miles up the river and then returned. We didn't even hear a good pun, the entire trip. The party appeared to be remarkable for stupidity. As we were about putting into port, some fellow who had seen raftsmen walking about on the logs, leaped out of one of the boats and tried his expertness, but he wabbled about like a goose in a hail storm and found great relief when assisted on board, and the meriment of the party ceased. We always advise a cobbler to stick to his last, and we now recommend as much to the aforesaid gentleman.

On our return to shore we were conducted to one of the numerous saw mills and the whole *modus operandi* was exhibited to us. Two logs were hauled up out of the Boom, the slabs sawed off, the logs moved into a score of perpendicular saws and reduced to boards, and the slabs to lath, all in less than five minutes. The party were all provided with carriages and returned to the Herdic House in excellent spirits.

At half past three o'clock the Association assembled in Elliots' Academy of Music—a most splendidly furnished building. A speech of welcome was delivered by the Mayor and the hospitalities of the city extended to us. The President of the Association made a happy reply and congratulated the Association upon the success of the Convention and suggested that we had met on the broad Platform of "Free Passes." An essay on newspapers was read by J. L. Ringwalt, of the Philadelphia *Telegraph*. Mr. Williamson's poem was read by Eugene H. Mundy, of the *Proof Sheet*. After a few motions in regard to the publication of the proceedings and returning thanks, the Convention adjourned.

The banquet at the Herdic House was announced for eight o'clock in the evening. That hour found about two hundred persons assembled in the large ordinary, around tables weighed down with all the choice and rare dishes of the season. We were in a good eating humor and did ample justice to what came before us, but the complicated Bill of Fare was a source of great annoyance to us. The waiter was the most stupid fellow we ever saw. We called for Mock Turtles roasted, with Beyrout sauce, stuffed, and he brought us the most queer dishes. We then called for Braized Champagne with Ham Sauce, boiled with Capons and Pork and Beans, dressed with Mushrooms, and the darned fool looked at us as if it wasn't on the bill. We really think that fellow hadn't good sense. We then gave him a quarter and requested him to bring us Dutch Chicken Croquettes, larded with Fricandeau of Veal, sauced with Madeira and breaded with Lamb Cutlets. He returned in the course of half an hour and said they were just out. We don't really believe the stupid fellow understood the Bill! When we called for Liqueurs, we suggested "stone fence." He responded in less than no time.

After ample justice had been done to the substantials and luxuries the cloth was removed and the meeting was called to order by the president, Mr. Smith, when the following toasts and responses were offered, viz:

"The State of Pennsylvania," Responded to by W. P. Furey, of the Mauch Chunk *Times*.

"The City of Williamsport." E. W. Capron, Williamsport *Gazette and Bulletin*.

"The Press of Pennsylvania." Hon. H. S. Evans, Westchester, *Village Record*.

"Our Mining and Petroleum Interests." Jacob Ziegler, Esq., Butler *Herald*.

"Our Guests." Judge David Naar, Trenton, N. J. *True American*.

"The Railroad and Commercial Interests of our State." Wm. Kennedy, Carlisle *Volunteer*.

"Woman." Maj. Z. K. Pangborn, Jersey City, N. J. *Journal*.

"Newspaper Reporters." Thomas M. Coleman, Philadelphia *Ledger*.

"Our Association." Henry T. Darlington, Bucks county *Intelligencer*.

Thursday morning, at 7.15 o'clock, we were ready to bid farewell to the kind hospitalities of Williamsport, and take the cars for Watkins, in Schyler county, New York, to partake of the genuine hospitalities of the Yorkers. Our route lay up the Northern Central Railway, by the Minnequa Spring to Elmira and twenty-one miles beyond, to the head of lake Seneca. The ride was rather a monotonous one, over a mountainous region to Minnequa. This place is about the last we know of. We tasted the waters and saw the bear and we were satisfied. A few enterprising little shavers sell considerable quantities of the water in quart bottles, at ten cents per quart, to the passengers in the cars and, thus make enough money to keep soul and body together. The entire stock of the boys was purchased by our party and it did not begin to reach around. An editorial wag, who had invested to some extent, came into our car and liberally gave to everybody who would drink, until he had emptied his bottle, when some one, in the kindness of his heart, suggested that he had none left for himself. To which the wag replied, with a very queer twinkle of his eyes, that there was plenty in the ice-cooler where he had got that which they just drank. "Sold! Sold!" was the universal shout and the wag replenished his bottle and went into the next car to repeat the sell. The Northern Central Railway passed us, without regular "Passes," and treated us in every way with the greatest kindness. The employees of the road sought only how to accommodate us, and spared no pains to make us comfortable. They deserve our warmest thanks.

The country through Bradford county, on to Elmira, is open and rolling, but not well adapted to wheat growing. In fact we do not remember seeing a single field of wheat after entering York State. It is principally adapted to grazing, corn, grass, grapes, &c., &c., which are produced here in great abundance. After leaving Elmira a colored boy distributed a large number of copies of the Pleasant Valley *Fruit and Vine Reporter*, a neat quarto, published by the Pleasant Valley Wine Company. A car load of high heeled Williamsport excurtionists were in the rear car and refused all intercourse with the outer world—no admission was permitted. The wag, who perpetrated the water sell, gathered up all the papers he could find and putting them under his arm, started back and insisted on selling these papers to the Williamsporters,—they saw the joke and caved. He was the recipient of good things enough to satisfy his appetite until his return home. At 12.30 o'clock P. M. we arrived at Watkins.

Watkins is situated at the head of Lake Seneca, about one-half mile, in a direct line, from the now famous Watkins' Glen. We left the cars at this point and wended our way through the village, under the leadership of Capron, of the *Gazette and Bulletin*, of Williamsport. It was a long and tiresome walk. Our companion declared, time and again, that she could go no further, while we trudged on, almost afraid to give utterance, lest she might be further discouraged and give out. Still we slowly trudged on. At last the slit in the hill made its appearance. It revived our drooping spirits slightly, but the great stair cases, which presented themselves, were more discouraging than encouraging. A slight circumstance occurred just at this point, which dispelled all our weariness, and sent us forward with renewed vigor. The water of the Glen, after rumbling, rattling, hissing, frothing, bubbling, for the distance of a mile or more, through rocks that it has been cutting away for two hundred centuries, to the depth of four hundred feet, lies quietly in a beautiful basin as if resting from its turbulent journey. Several impetuous gentlemen had gone down to this pool and were prospecting about it, when the feet of one slipped from under him suddenly and for a moment he went to the bottom of the pool. It was only for a moment He was erect the next instant and his head above water. A sudden shock, and then all beheld that he was safe, and then the laugh! It was most hearty. A minute later and we began to ascend the stair cases. Slowly and admiringly we ascended! Oh how grand! How magnificent! Up, up, we went, along, beneath, through hundreds of feet of hewn rock. Up an almost perpendicular stair case of fifty feet, and how the ladies fainted and used up our brandy we havn't time to tell, to the Mountain House. Here a magnificent repast was prepared for us by the proprietors, and we were just in trim for it. After dinner we went on up to the head of the Glen, saw the magnificent rainbow, walked beneath the cascade and scrambled up the almost perpendicular rocks. How we would like to describe this wonderful natural scenery, step by step, glen by glen, to our readers, to do it, and us justice, but space forbids. In Europe they say "see Rome and die," in the West, Yosemite, but to those who can neither visit Rome nor Yosemite, we say, see Watkins' Glen and die. The great Glen is divided into a series of smaller glens known as Glen Alpha, Glen Obscura, Glen Cathedral, Glen of the Pools, Glen Difficulty, Glen Arcadia, Glen Facility, Glen Horicon, Glen Elysium, and Glen Omega.

We visited the Cemetery and gazed with rapture upon Lake View, and then descended into the village to be entertained at the Jefferson House. After tea we were escorted on board the Duncan S. Magee and steamed up one shore of the lake, for a distance of five or six miles, and down the other. It was a splendid treat in the cool of the evening. The party could not have been, under any circumstances, entertained with greater hospitality than they were by the citizens of Watkins. No charges were made against us from the time we entered the State of New York until we left, and yet we fared sumptuously on all hands. We shall ever remember their kind hospitality and wish them the choicest of blessings.

At nine o'clock, p. m., we took the train for Williamsport. At Elmira and Troy a number of our friends stopped off to spend Friday at Minnequa. There were no attractions there for us and at 2 o'clock we landed again at the Herdic House. At 4 o'clock we took the cars of the P. & E. R. R. for Lock Haven, where we stopped for breakfast. Here we met our mutual friend, Capt. Wm. C. Hollahan, of Bedford, who ordered a splendid turn out and drove us all over the town. We were very much pleased with the place and the thrift and enterprise of its people. At 9 o'clock the Captain delivered us at the station and we took the train for Tyrone, where we arrived at 12 o'clock or thereabouts. The gentlemen who control the Bald Eagle Valley and Philadelphia and Erie roads will accept our thanks for the great kindness and courtesy shown us. These roads are in excellent condition and deserve the patronage of the public. They run through wild sections but they are fast developing the hidden sources of wealth and building up communities that will be the pride of the nation.

At a few minutes before 4 o'clock we were on board of M'Ateer's mail train for Huntingdon, spinning away over a road bed as smooth as glass, without a jar, at the rate of forty miles an hour. Oh the Central! the Great Central! is the road after all. And Mac is a clever conductor! "Huntingdon!" Good-bye, Mac! and we are at home.

We have no general reflections to make upon the party save to say that it was admirably handled by Mr. R. S. Mennamin, to whom too much credit cannot be given for its admirable success. So mote it be.

Miss Louisa M'Alcott, the popular writer, arrived from her tour of Europe. She is now at her home in Concord, Massachusetts.

☞ We have read, with great pleasure, the oration delivered in Bedford, by G. H. Spang, Esq., of that place, on Decoration Day and we congratulate the Grand Army in securing so able and so accomplished a student of nature as our friend Harry for that occasion. As an orator Mr. Spang has few equals in the interior of Pennsylvania, and as a criminal lawyer he is second to none. Harry, get up a lecture, and we will promise you a good house.

☞ Hon. Clement L. Vallandigham, of Dayton, Ohio, accidentally shot himself in the abdomen, with a pistol, on last Friday night, which proved fatal and he died on Saturday. He was defending McGeehan, at Lebanon, for the murder of Myers, and was preparing his argument. He had an empty and loaded pistol lying on the table, and was showing how Myers might have shot himself. He unfortunately picked up the loaded pistol instead of the empty one, which went off, the ball passing through the abdomen.

☞ Details of the total destruction of the Peruvian ship, Don Juan, set on fire at sea, and supposed to have been done by coolies entrapped on board at Macao, have been received by steamer. The crew abandoned the vessel, with five hundred and fifty coolies fastened under the hatches. Five hundred of them roasted alive. The others escaped when the hatches burned off. She was an American built ship, and was sold to the company by Maratina De Peru, of San Francisco, and christened the Dolores Uquate. She was fitted out here for the coolie trade, and returned here several times for supplies while engaged in the traffic.

☞ The Republicans of Philadelphia met in Convention on Wednesday last, and placed in nomination the following ticket: Mayor—Wm. S. Stokley; Judge of the District Court—James T. Mitchel; District Attorney—Wm B. Mann; Prothonotary—J. H. Loughridge; City Treasurer—Peter B. Wedener; City Solicitor—Gen. C. H. T. Collis; City Controller—Samuel B. Hancock; *Senators*—Second District, E. W. Davis; Fourth District, Geo. Connell.

Representatives—First district, George Handy Smith; Second district, Horrace D. Gaw; Fourth district, William Elliott; Fifth district, John J. Franklin; Sixth district, William Duffy; Seventh district, H. J. Potts; Eighth district, Samuel Daniels; Ninth district, W. H. Vogdes; Twelfth district, George W. Fox; Thirteenth district, Samuel D. Strock; Fourteenth district, John Lamon; Fifteenth district, Adam Albright; Sixteenth district, A. J. Levering; Seventeenth district, G. H. Griffiths; Eighteenth district, Dr. J. N. Marks.

State News.

There are at present nineteen persons in the Venango county jail.

Gangs of Philadelphia burglars are operating in the mining regions.

A corps of engineers are now at work locating the Clarion and Tionesta railroad.

Chales W. Pittman, sheriff of Schuylkill county, died suddenly on Friday last.

Sixteen hundred and ninety rafts have navigated out of Redbank, Clarion county, this year.

Oil City intends to build a big hotel, out of which stockholders will receive no dividends.

A young man attempted to commit sucide in Titusville, yesterday, by taking laudnum.

Ground is being cleared for the erection of the new depot of the Union and Titusville railroad, in Titusville.

Country merchants all over the State are complaining of the imposition practiced by New York and Philadelphia drummers.

A good deal of damage is being done now by lightning. A flock of sheep belonging to Samuel Thomas, was suruck and killed in Washington county, last week, and a barn with its contents, the property of A. Funk, was destroyed by it in Westmoreland county.

Trolling for eagles is the latest amusement in Erie. A sportsman, while fishing with a spoon hook, was surprised to see a huge eagle dash down on the bait and swallow it, thus securely fastening him. He was hauled to the boat, and made such desperate exertions to break away that his wings had to be broken before he could be captured.

A pack of five wolves still infest the woods in Rye and adjoining townships. Mr. John Zorger, of Carroll, fired twice at a wolf last week, but failed to kill it although wounding it severely. Five were seen last week crossing Sherman's creek about a mile above Dellville, by a Mr. Matlack. These are no doubt the same ones seen at various times in Rye township. On Monday, the 29,ult. a party of ten persons went in pursuit of the wolves, but we have not yet heaed the result of the hunt.—*Perry Advocate*.

Every week witnesses some new development of the mineral riches of the Keystone Commonwealth. A singular and valuble quarry has been discovered in Tioga county, which is described as an immense deposit of stone plank. It covers some six acres and the stone are found ready for use–smooth, true, and of uniform thickness in slabs of more than twenty-feet long, ten inches in with, and from one to three or four inches in thickness; each stone, however, preserving its thickness as nicely as if sawed out by machinery. The stone is very sound in texture, even in grain, and when first taken from the quarry, soft enough to work easily, though it soon becomes like hard gray granite when exposed to the atmosphere. It is a fact hard to account for that the edges of these slabs are as true in most of the specimens as though worked by a skillful stone-cutter.

Personal.

Gen. Simon Cameron has arrived at home from his Southern tour.

Gen. Horace Binney Sargent will deliver the Fourth of July oration in Boston.

Mr. Amos Robbins has resigned the presidency of the Monmouth Park Racing Association.

Judge Reid, of the Massachusetts Supreme Court, resigned his position because the salary is not sufficient to support him.

Charletta Patti arrived at Kingston, Jamaica, from Panama a few days ago. She is on her way to England.

Mr. L. M. Price having resigned his place as chief of the division of issue in the office of Comptroller of the Currency, Mr. J. Franklin Bates, of Boston, has been appointed his successor.

Seven thousand New Yorkers went to Europe last Saturday.

Secretary Delano, who is now in Georgia, will go to Ohio to spend a few days before returning to Washington.

Mr William H. Seward and his party arrived at Cario, Egypt, about the middle of May, where he was welcomed by Mr. Butler, the United States Consul, and representative of the Khedive. A palace was provided for Mr. Seward's use while he remains there. He will proceed from Egypt to Palestine and Constantinople

Mrs. Gen. Gaines of law-suit fame is now sixty-four years old. but set to work, the other day, as briskly as ever in a new law-suit. She is now the richest woman in the world, probably next to Baroness Coutts, and has unlimited offers of marriage from youth and age, but prefers to remain single. She is bent on doing good with her fortune, and proposes several excellent institutions for women.

BLIND TOM CONCERT!
AT
YENTER'S HALL, THURSDAY EVE, June 22.

First Appearance in Huntingdon of the Marvelous Prodigy,

BLIND TOM!

The great Incomprehensible Musical Mystery of the 19th Century.

This wonderful negro boy Pianist who is attracting so much attention throughout the country, was born in Georgia. Blind from his birth, and without a ray of ordinary intelligence, yet he plays the most difficult operatic pieces, not only brilliantly and beautifully, but with all the taste, expression and feeling of the most distinguished artist. When his mind became clouded and the veil of darkness was drawn over his eyes, as if to make amends for the infliction upon the poor negro boy, a flood of light was poured into his brain, and his mind became an opera of beauty, written by the Hand of God in sylables of Music, for the delight of the world. He is presented to the public as surpassing everything heretofore known as a musical phenomenon.

Admission 50 cts. Reserved Seats 75 cts. Doors open at 7½ performance to commence at 8 P. M.

Tickets for reserved seats may be had at Lewis' Book Store.

NOTICE.—

SHERIFF'S SALE.
By virtue of a writ of Fi. Fa. to me directed I will expose to public sale, at the Court House, in Huntingdon, on Friday, the 4th day of August 1871, at one o'clock, p. m., the following described real estate, to wit:

All that certain tract of timber land, situate in Black Log Valley, Shirley township, Huntingdon county, and bounded as follows: On the north by lands of William Morgan, on the east by lands of John Lefford, Sr., on the south by lands of Hance R. Campbell and John Morgan, and on the west by lands of James Morgan, containing 311 acres, more or less, 50 acres of which are cleared and the balance well timbered, principally with White Oak, and having thereon erected a plank dwelling house, with Basement and Summer Kitchen, Frame Stable, a new Water Power Saw Mill with two Circuirr Saws, one Power Crosscut and one Sash saw, there is connected with the Mill a Stave Cutter, two Steam Chests and Steam Boiler with Force Pump. All of the above improvements are new, having been made within the past three years. Black Log Creek runs through the property affording an ample supply of water. This property is situated on the township road almost eight miles from Mt. Union.

Seized, taken in execution, and to be sold as the property of D. W. Witmer, Jacob Sneath, Levi Myers with notice to George J. Smith terre tenant.

D. R. P. NEELY,
June 7, 1871. Sheriff.

A. R. BECK, Fashionable Barber and Hairdresser, Hill street, opposite the Franklin House. All kinds of Tonics and Pomades kept on hand and for sale. [ap19,'71–6m

ALS AWARDED THE GREAT
BALTIMORE PIAN
MANUFACTORY.
WILLIAM KNABE & C
MANUFACTURERS, OF
GRAND, SQUARE AND UPRIG
PIANO FORTES,
BALTIMORE, MD.

These Instruments have been before the p
for nearly Thirty years, and upon their excel
alone attained an unpurchased preeminence, v
pronounces them unequalled. Their

TONE

combines great power, sweetness and fine sin
quality, as well as great purity of Intonation
sweetness throughout the entire scale. Their

TOUCH

suppliant and elastic, and entirely free from
stiffness found in so many Pianos.

IN WORKMANSHIP

they are unequalled, using none but the very
seasoned material, the large capital employe
our business enabling us to keep continually
immense stock of lumber, &c., on hand.
All our Square Pianos have our New Impr
Overstrung Scale and the Agraffe Treble.
We would call special attention to our late
provements in Grand Pianos and Square Gra
Patented August 14, 1866, which bring the P
nearer perfection than has yet been attained.

EVERY PIANO FULLY WARRANTED
FIVE YEARS.

We have made arrangements for the Sole W
sale Agency for the most Celebrated

PARLOR ORGANS AND MELODEANS

An exchange indulges in the following lan-
age on the walk of a pair of lovers seen by
e editor on a lovely evening: "The gait in-
lged in by these aspirants to conjugal felici-
would shame a tortoise and make a snail
e of envy."

Broad Top has just added a splendid passen-
r car to "Dolph's" Mail train—just new from
e shop. It is a real comfort to ride in such
car. Rhom's Lightning Express has been
sed to the dignity of two excellent passen-
r cars. Broad Top is about as well supplied
this respect as any branch road in the State.

Fasten a nail or key to a string, and suspend
your thumb and finger, and it will oscil-
e like a pendulum. Let some one place his
en hand under the nail, and it will change
circular motion. Then let a third person
ace his hand upon your shoulder, and the
il becomes in a moment stationery.

A farmer named James Glasgow, of Bells
lls, seriously injured his neighbor Mr. P. C.
out who visited him to complain of raids on
s potato crop by Mr. G's. hogs, by striking
m on the head with a hoe. The affair will
legally investigated, and ten times the dam-
e spent by both sides in law.

The latest scheme for swindling farmers is
wrought iron plow point, fitting into a hol-
w square, the economy of which is wonder-
l. Those that have been bitten find that
ought iron points cost more apiece than
tire shares of cast iron. As these plow
int swindlers are understood to be making
hurried sweep through the country, papers
sirous of saving their patron's pockets will
rect attention to this swindling scheme. It
sts the farmers of the West about two hun-
ed thousand dollars last year.

Bedford and Bridgeport Rail Road.—A little over eight months ago the survey of this road was begun. A great many people then had their doubts and fears of the actual completion of the road. Experience had taught them that a corps of engineers might be engaged for years in making surveys and re-surveys and yet the whole affair end in smoke—other than that of the locomotive. But we are pleased to note that such is not the case with the B. & B. R. R. Ever since the first "level" was taken to the present moment, the engineering department has been characterized by unusual activity, and no efforts have been spared to make an efficient, safe and economical railway. The advanced condition of the road is in a great measure due to the energy and ability of the Chief Engineer, Mr. Fulton, seconded by his skillful and gentlemanly assistants. We are pleased to learn that at a meeting of the head men of the Pennsylvania Central into whose hands the B. & B. R. R. has actually passed—held in Philadelphia last week, Mr. Fulton was retained as Chief Engineer of our road. The men of the Central have thus shown their appreciation of the valuable services of Mr. Fulton and their confidence in him as a skillful engineer. The place could certainly not have been filled by a more competent man, and we have no doubt that Mr. Fulton will prove—as has been the case thus far—to be "the right man in the right place.—*Bedford Gazette.*

Terrible Accident.—On Saturday evening last, while the family of Alex. Rutledge of Williamsburg, were preparing to retire for the night, his daughter Mollie, a young lady eighteen years of age, remarked that she felt hungry and would go to the cellar and get a piece. A few moments after she left the room the family were startled by hearing her give utterance to piercing screams. Rushing to her assistance, they were horrified to find her enveloped in flames. Every effort was made to extinguish the fire, but before this was accomplished she was terribly burned, especially about the lower portion of her body.

No one saw the accident and no one can give a positive statement of the manner in which it was brought about, but it is supposed that the lamp which she carried fell from her hand, and was broken, and the coal oil igniting fired her clothes. The lamp had been broken and soldered together and others think it possible that it fell apart while she was going down the cellar steps.

The young lady was terribly and fatally burned. Everything possible was done to alleviate her sufferings, but she lingered in great agony for about twenty-four hours when death came to her release. She was an estimable young lady and her sudden taking off will be deeply mourned not only by a large circle of acquaintances but also by her afflicted relatives.—*Hollidaysburg Standard.*

A Noble Act.—On Thursday afternoon last, as the Express train on the Western Pennsylvania Railroad was proceeding Eastward, and rounding a curve about midway between Leechburg and Apollo, in Armstrong county, the engineer observed a woman on the track, waving her apron violently in the air. The first thought was of danger and he immediately applied his brakes and got the train stopped just in time to prevent a terrible accident, as a mass of rocks, weighing about fifteen tons, had fallen upon the track a few rods from where the woman had given the signal. When the train was stopped, the passengers were not long in ascertaining the cause, and appreciating the noble conduct of the poor country woman to whose presence of mind they owed their rescue from a shocking causality. Colonel Hicks, the conductor of the train at once consulted with some of the passengers, and a in short time a purse of twenty dollars was made up and presented to her. She gave her name as Mrs. Frank. A passenger on the train, from whom we obtained our information, desires that we should commend the case of this humble woman to the company. Had it not been for her warning signal, the train would have been dashed into the rock, and serious damage to the train, if not to the passengers would have been the consequence.—*Altoona Tribune.*

Progressing.—It is really astonishing to witness the progress of our county within the past three or four years. In all the towns and parts of the country the spirit of improvement has taken hold of the people, new residences, stores, churches and schoolhouses have been erected, and the unsightly land marks of old fogyism have been removed by the introduction of improvements in keeping with the age. Especially do we notice the rapid building up of the towns along the line of the railroad. Bedford town, too, has added more to her borders within two years than for a quarter of a century previously. Of our own town we have nothing to say, but merely point to the many new and beautiful buildings that bear the marks of newness on them. Saxton and Riddlesburg, are likewise striking evidences of the truthfulness of the remarks. A few years ago they were but small way stations, now they present to the traveler the appearance of young cities. A few more enterprising iron companies like the Kemble, and a little bit of exertion on the part of our people and old Bedford will take the place she deserves in the front rank of the live counties of the good old Commonwealth. So mote it be.—*Bedford County Press.*

In Memoriam.—Rev. David Shoaff, well known to many of our citizens, died at Wooodstock, Va., on the 27th ult.

Mr. Shoaff was born in Perry county, Pa., was converted under the ministry of Rev. Jacob Gruber, and entered the Baltimore Conference, in 1848, with a class of twenty-five young men. In 1851 he was united in marriage to Maggie, daughter of Rev. James Watts, of precious memory. Nine years of his ministerial life were spent in Maryland, seven in Pennsylvania, and six in Virginia. Among his prominent appointments were Huntingdon and York, Pa.; Frostburg, Hereford, and Emory Chapel, Md.; and Leesburg, Loudon, and Woodstock, Va He withdrew from us in 1866, and was received into the Baltimore Conference of the M. E. Church South. He was a man of great energy and zeal, of fine preaching abilities and was unusually successful in winning souls to Christ and erecting churches. He built the present church in this place. Mr. Shoaff will be sadly missed by his brethren and his death will be sincerely mourned by his co laborers.

Is it Right.—The following appeal for money is not without humor and abounds in truth. It appeared in the Easton *Argus* about forty-two years ago, and is not by any means out of date: "We have many subscribers who have paid us nothing. Do such people think we can live on birch bark, like a Cossack's horse, or grow fat by inhaling the west wind? Do they suppose that the Female Charitable Society finds us with clothes? Do they suppose that paper, type, ink, fuel and many other costly and necessary articles are sent us by an unknown and invisible hand? Whatever Dr. Faustus might have done, the black art of modern printers has no such magic in it. When hungry we have no time to fish or hunt, and it would be impious to expect a sheet full of good things to be miraculously let down from the heavens by the four corners, as in the case of Peter, and, as to being fed by ravens, it is more likely that ravens will feed scantily upon us, unless we get some money shortly."

Just received a large lot of prime Greencastle Cradles, Scythes, Snaths, Rakes, Sickles and agricultural implements in general at Wharton's. [june21–4t.

A Villain Foiled.—An attempt to commit one of those most brutal of human offenses, of which we hear such frequent mention lately, was most opportunely frustrated in this city last Monday afternoon. A Frenchman named Josephs had been observed paying rather familiar attention to several little girls on eighth avenue, treating them to candy, etc. But this excited no suspicion of an evil design. In the afternoon, however, he approached two of the children, neither of them over eight years of age, and asked them if they didn't want some money, exhibiting a fifty cent note. One of the children took alarm at this and fled into the house and told her mother that a man had taken her companion to an outhouse to murder her. The lady greatly alarmed, went to the child's rescue in good time, and immediately called for help, which was promptly afforded by Mr. C. Houser, who did not wait for warrants or any other sort of red tape, but promptly proceeded to his capture, and the only wonder is that he was able to shield the villian from the vengeance of an incensed community. He was taken before Alderman McCormick, who sent him to jail at Hollidaysburg.—*Altoona Sun.*

An immense rush at Wharton's Hardware Store for Greencastle, Feerar and Ohio grain-cradles. [june21–4t.

Unpatented Lands.—Among the general laws passed by the last Legislature and approved by the Governor, is the following, which is of importance to all owners of unpatented lands. The Harrisburg *Journal* says, we understand that efforts were made to modify its provisions, but without success, from which it is evident that it is the policy of the State to have this long unsettled business closed up as speedily as possible, and this is commendable since it is not only the interests of the State, but the security of purchasers of real estate, whose titles may be affected thereby, require it:

Be it enacted, etc., That the board of property shall have full and discretionary power as to the time of entering suits, and the number thereof, to be brought for the collection of liens against unpatented lands, and the Attorney General shall proceed under the seventh section of said act, to which this is a further supplement, when authorized to do so by saie board: *Provided,* That no interest shall bd charged on patent or other fees.

The celebrated M'Fadden, also single and double Harpoon Hay Forks for sale at Wharton's Hardware Store. [june21–4t.

How to Build up a Town.—The Mercer *Dispatch* gives the following recipe for building up a town. We commend it to our merchants and business men: "The best way to build up a town, is for every business man in the place to advertise his business in the columns of the local paper, and thus present an array of business houses equal to the number of houses on our street. It draws trade to the town, draws emigrants to the town, draws money to the town. If a man wants to buy anything, he goes where he sees the most men trying to sell that article. If he wants to sell anything, he goes where the most men are buying. If a man wants to buy groceries or to sell produce, he goes to the business man that advertises, for he knows where to find him, and what he has to sell.

Children's Coaches, Fishing Rods, Ice Cream Freezers, Churns, Brass Kettles, Feed Butters, &c., &c., very low at Wharton's Hardware Store. [june 21–4t.

Summer Beverage.—Here is a recipe for making Ginger Beer, a very wholesome and refreshing summer beverage: Put two gallons of cold water into a pot upon the fire; add to it two ounces of good ginger bruised, and two pounds of white or brown sugar. Let this come to a boil, and continue boiling for about half an hour. Then skim the liquor and pour into a jar or tub, along with one sliced lemon and half an ounce of cream of tartar. When nearly cold put in a tea-spoonful of yeast, to cause the whole to work. The beer is now made; and after it has worked for two days, strain it and bottle it for use. Tie down the corks firmly.

Unripe Fruit.—Parents cannot be too careful about allowing their children to eat unripe fruit, which will soon be plenty, and which is so tempting to the little ones. And it is particularly dangerous, after eating green trash, to drink heartily of water. Children are all alike in this respect, and it behooves parents and those who have charge of them to exercise a great deal of firmness and judgment in regard to what the children eat during hot weather. Physicians say that much sickness prevalent among children is caused by this lack of judgment or care on the part of parents and guardians.

Death to Bugs.—A correspondent sent us the following receipt which he has successfully used for years. It is certainly worth trying: Bugs on squash and cucumber vines—How to destroy them—Dissolve a tablespoonfull of saltpetre in a pailful of water, put one pint of this around each hill, shaping the earth so that it will not spread much, and the thing is done. Use more saltpetre if you can afford it—it is good for vegetation but death to animal life. The bugs burrow in the earth at night and fail to rise in the morning.

Moss on Flower Pots.—Ladies who are fond of cultivating flowers in the house, will find great benefit to the plants by spreading a coating of moss over the earth in their flower pots. This keeps the water from evaporating, and temperature more uniform. Tea grounds are often used for the same purpose. Where a flower pot sets in a saucer, with a hole in the bottom of the pot, put a little sand in the saucer, and cover it with moss, and you have a simple and admirable arrangement.

Blind Tom is Coming.—Our readers will be pleased to learn that the wonderful negro boy, Blind Tom, will give us a concert in Yenter's Hall, on Thursday night next. It is needless for us to say anything concerning the abilities of this musical prodigy, as his reputation is world-wide, and his name as "familiar as household words." Our citizens should avail themselves of this opportunity of hearing the greatest pianist of the age. See advertisement in another column.

A Home-made Disenfectant.—Dissolve a bushel of salt in a barrel of water, and with the salt water slack a barrel of lime, which should be wet enough to form a kind of paste For the purpose of a disinfectant, this home-made chloride of lime is nearly as good as that purchased at the shops and drug stores. Use it freely about sinks, cellars gutters and out houses, and in this way prevent sickness, suffering and expense.

Flies.—Those who desire to be rid of these troublesome summer pests, need only to use the following simple remedy: Take half a spoonful of black pepper in powder, one teaspoonful of brown sugar, and one teaspoonful of cream; mix them well together and place them in a room on a plate, where the flies are troublesome, and they will soon disappear.

Township Clerks, take Notice.—By the new law, township clerks are required, within sixty days after the annual election, to make out and publish a full and complete statement of the financial condition of such township under a penalty of $10.

Mountain Seminary.—The closing examinations will be held Monday and Tuesday, June 26th and 27th. Concert of vocal and instrumental music, Tuesday evening, at 7½ o'clock, admittance to concert, 30 cents. Address by Dr. L. T. Wilson, 10½ a. m., Wednesday June 28th.

Wharton & Miller.
May 17, 1871.–tf.

To Nebraska, California, and Kansas, and the B. & M. R. R. Lands.—The "Burlington Route," so called, lies right in the path of the Star of Empire. It runs almost immediately in the center of the great westward movement of emigration. Crossing Illinois and Iowa, it strikes the Missouri river at three points.

These three points are the gateways into three great sections of the trans-Missouri region.

The Northern gate is Omaha, where the great Pacific road will take you to the land of gold and grapes, sunny mountains, and perpetual summer.

The middle gate is Plattsmouth, which opens upon the south half of Nebraska, south of the Platte river, a region unsurpassed on the continent for agriculture and grazing. Just here are the B. & M. Railroad lands, concerning Geo. S. Harris, the land officer at Burlington, Iowa, can give you all information, and in the heart of them is Lincoln, the State Capital and present terminus of the road.

The Southern gate leads to Kansas, by connections with the St. Joe Road at Hamburg, running direct to St. Joe and Kansas City.

The trains of the Burlington run smoothly and safely, and make all connections. It run the best of coaches, Pullman Palace and Pullman dining cars, and should you take the journey for the journey's sake alone, you will be repaid; or take it to find a home or a farm and you cannot find either better than among the B. & M. lands, where you can buy on ten years' credit, and at a low price. tf.

The postage on *Harper's Weekly* is 20 cents a year, which must be paid at the *subscriber's* post office.

May17 Address HARPER & BROTHERS, New York

AGRICULTURAL IMPLEMENTS.

The excelsior Reaper and Mower, manufactured by H. J. F. Seibering & Co., Akron, Ohio, is no experiment but a tried reality. Having been before the farmers for eleven years, and 50,000 of them now being in use, speaks well for the machine. It took the first premium at the trial of machines at the Agricultural College, Centre Co. Pa., July 27th and 28th, 1870.

The Kirby, Champion, Keystone, World, Dodgeself Rake, Ohio Harvester, Hubbard and the Excelsior were represented. The Excelsior took the first premium as the best dropper and as the best machine on account of simplicity of construction, lightness of draft, and other important features in the machine. The undersigned is prepared to fill orders for the above machines at short notice. Send in your orders early as our supply will not meet the increasing demand. I can supply farmers wanting Hay Forks, with the best Fork in the market (McFaddens). Orders by mail for either of the above articles will receive prompt atention. Orders for machines left at Wharton & Maguires hardware store will receive prompt attention. Pamphlet and price list sent free by addressing T. W. Montgomery, Neff's Mill, Huntingdon County Pa. may24.

NATURE'S HAIR RESTORATIVE

Contains no Lac Sulphur—No Sugar of Lead—No Litharge—No Nitrate of Silver, and is entirely free from the Poisonous and Health-destroying Drugs used in other Hair Preparations.

Transparent and clear as crystal, it will not soil the finest fabric—perfectly SAFE, CLEAN, and EFFICIENT,—desideratums LONG SOUGHT FOR AND FOUND AT LAST!

It restores and prevents the Hair from becoming Gray, imparts a soft, glossy appearance, removes Dandruff, is cool and refreshing to the head, checks the Hair from falling off, and restores it to a great extent when prematurely lost, prevents headaches, cures all humors, cutaneous eruptions, and unnatural heat. *As a Dressing for the Hair it is the best article in the market.*

DR. G. SMITH, Patentee, Ayer, Mass. Prepared only by PROCTOR BROTHERS, Gloucester, Mass. The genuine is put up in a panel bottle, made expressly for it, with the name of the article blown in the glass. Ask your Druggist for Nature's Hair Restorative, and take no other.

☞ Send two three cent stamps to Proctor Brothers for a "Treatise on the Human Hair." The information it contains is worth $500,00 to any person. [my.10'71–yr.

For sale by JOHN READ, Huntingdon.

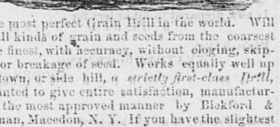
PRIVATE RESIDENCE FOR SALE.

Having gone into business at this place I propose to sell my private residence at Bedford, Pennsylvania, at private sale.

It is unnecessary for me to give a description of it to those who are acquainted with it, and to those who have not seen it, and who desire to purchase a neat and complete residence I would say go and examine it. The house was entirely overhauled and renovated but a year or two ago. It is located upon a full lot of ground, 60 feet by 240, on East Pitt street, and the corner of an alley leading to the Steam Mill, which makes it one of the most public places in the town in a business point of view. The lot is under drained by numerous drains, and is second to none in the place. It has produced all the garden vegetables used by my family for years. In addition there is a flower garden and a considerable quantity of excellent fruit. There is a perpetual insurance upon the house.

Address me at Huntingdon or Bedford, Pa.
J. R. DURBORROW.
Huntingdon, Pa., May 31, 1871.

THE FARMERS FAVORITE.



The most perfect Grain Drill in the world. Will sow all kinds of grain and seeds from the coarsest to the finest, with accuracy, without cloging, skipping or breakage of seed. Works equally well up and down, or side hill, *a strictly first-class Drill*, warranted to give entire satisfaction, manufactured in the most approved manner by Bickford & *Huffman*, Macedon, N. Y. If you have the slightest notion of purchasing a Grain Drill, please send us your address, it will pay you well to do so. Prices reasonable. Terms accommodating.

Address, P. L. SWINE,
Shirleysburg, Pa.

Leave Cumberland, by Mt. Savage cars, at three o'clock, p. m., changing cars at Kreigbaum's for Bridgeport. 22mar.

New Advertisements.

"Unquestionably the best sustained work of the kind in the World."

HARPER'S MAGAZINE.
Notices of the Press.

No more delightful travels are printed in the English language than appear perpetually in *Harpers Magazine*. They are read with equal interest and satisfaction by boys of every grade from eighteen to eighty. Its scientific papers, while sufficiently profound to demand the attention of the learned, are yet admirably adapted to the popular understanding, and designed as much to diffuse correct information concerning current scientific discovery as it could be if it was the organ of the "Society for the Diffusion of Useful Knowledge." The great design of *Harper's* is to give correct information and rational amusement to the great masses of the people. There are few intelligent American families in which *Harper's Magazine* would not be an appreciated and highly-welcome guest. There is no monthly Magazine an intelligent reading family can less afford to be without. Many Magazines are accumulated. *Harper's* is edited. There is not a Magazine that is printed which shows more intelligent pains expended on its articles and mechanical execution. There is not a cheaper Magazine published. There is not, confessedly, a more popular Magazine in the world.—*New England Homestead.*

SUBSCRIPTIONS.—1871.
Terms:

Harper's Magazine, one year $4 00

An extra Copy of either the *Magazine, Weekly,* or *Bazar* will be supplied gratis for every Club of Five Subscribers at $4 00 each, in one remittance; or, Six Copies for $20 00, without extra copy.

Subscriptions to *Harper's Magazine, Weekly* and *Bazar* to one address, for one year, $10 00; or, two of Harper's Periodicals, to one address, for one year, $7 00.

Back Numbers can be supplied at any time.

A complete set of *Harper's Magazine*, now comprising 41 Volumes in neat cloth binding, will be sent by express, freight at expense of purchaser, for $2 25 per volume. Single volumes, by mail, postpaid, $3 00. Cloth cases, for binding, 58 cents, by mail postpaid.

The postage on *Harper's Magazine* is 24 cents a year, which must be paid at the subscriber's post-office. Address

Farm and Household.

Useful Recipes.

Cure for Corns.—Take a lemon, cut off a peice of rind, then nick the lemon so as to let in the toe with the corn—the pulp next the corn; tie this on at night so that it cannot move; in the morning with a blunt knife you can par it away to a great extent. Two or three applications of this will make a poor cripple happy for life.

Sun Stroke.—The *Fremdenblatt* contains a correspondence from a traveller who, on March 23, 1866, was near the Dead Sea with a party of eighteen, one of whom fell from his horse overcome by the excessive heat of 42 deg. R. (126. 5 deg. F.) One of the Bedouin guides bathed his hands, head and face with lemon juice, after which the sufferer was able to ride two hours to the Jordan, where he could rest for several hours, and then completly recovered.

Currant Catsup.—Nice, fully ripe currants 4 lbs.; sugar, 1½ lb.; cinnamon ground, 1 tablespoonful; salt, with ground cloves and pepper, each one teaspoonful; vinegar, one pint. Stew the currants and sugar until quite thick; then add the other ingredients and bottle for use.

Small Pox.—A physican in Sioux City, Iowa, uses an ointment made of charcoal and lard to prevent pitting in small pox. This is applied freely over the surtace of the face, neck and hands as soon as the disease is distinguished, and continued until all symptons of suppurative fever have ceased. The application allays the itching, and seems to shorten the duration of the disease, and leaves the patient without a blemish, the eruption protected by the ointment not even showing signs of postulation, the charcoal preventing the action of light and the lard that of air.

Moths.—The following recipe is said to have kept out moths from a furniture warehouse for ten years past. May it do so for ten years to come: "Flour of hops, one drachm; Scotch snuff, two ounces; gum camphor, one ounce; black pepper, one ounce; cedar sawdust, four ounces. Mix thoroughly, and strew, or put in papers among the goods."

Cream Sponge Cake (very superior.)—Six eggs, two cups of flour, the same quantity of sugar, two teaspoonfuls of cream of tartar well mixed in the flour, and one-half of a teaspoonful of soda dissolved in a very little hot water; beat together the yolks of the eggs and the sugar until perfectly light and creamy; add to it the well beaten whites, then the flour, and last of all soda. Bake in round tins, about an inch thick.

To Remove the Taste of Wood.—A new keg, churn, bucket, or other wooden vessel, will generally communicate a disagreeable taste to anything that is put into it. To prevent this inconvenience scald the vessel well with boiling water, letting the water remain in it until cold: then dissolve some pearlash or soda in lukewarm water, adding a little lime to it. Wash the inside of the vessel well with this solution. Afterward scald it well with hot water, and rinse with cold water before you use it. The reason for this is the ready combination of resinous matter, with alkalies to form compounds soluble in alchol

To Make Stale Bred Fresh.—Put the loaf into clean tin, and cover closely to exclude all water, and set into a steamer or kettle of boiling water for half an hour; then remove from tin, and it will look like fresh bread, and be really almost equ l to a new loaf.

Gargle for Sore Throat.—Strong sage tea, half pint; strained honey, common salt, and strong vinegar, one table spoonful of each; Cayenne pepper, pulverized, one rounding tea spoonful; steep the Cayenne with the sage; strain and mix in a bottle for use. Gargle from four to a dozen times daily, according to the severity of the case.

Milk Clean.

In some careful experiments made by Dr. Anderson, the quantity of cream obtained from the first drawn cup of milk was in every case smaller than the last drawn; and those between afforded less or more, as they were nearer the beginning or the end. The quantity of the cream obtained from the last drawn cup from some cows, exceeded that from the first in the proportion of sixteen to one. In others the proportion was not so great. "Probably," says Dr. Anderson, "on an average of a great many cows, it may be found to run as ten or twelve to one." The difference in the quality of the cream was also much greater than the difference in quantity. From this it appears that the person who by bad milking of his cows loses but a pint of his milk, losses in fact about as much cream as would be afforded by six or eight pints at the beginning, and losses, besides, that part of the cream which alone can give richness and high flavor to butter.

Felon on the Finger,

Many persons suffer extremely from felons on the finger. These afflictions are not only painful, but frequently occasion permanent crippling of the members affected. The following simple prescription is recommended as a cure for this distressing ailment: Take common rock salt, such as is used for salting down pork or beef, and mix with spirits of turpentine in equal parts; put it on a rag and wrap around the effected part, and as it gets dry, put on more, and in twenty-four hours you are cured. The felon will be dead. It will do no harm to try it.

When to Kill Bushes.—B. F. Tulley writes the *Rural New Yorker* that the best time to kill trees and bushes is to "cut them in the dark of the moon in July or August, when the sign is in the *heart.* There will be no trouble in killing any kind of a tree or shrub. This year the days to be chosen should be the 18th and 19th days of July. I speak from experience; have killed the Black Locust with a single stroke of the ax."

We made a test the other day to see what effect Tobacco would have on a Potatoe Bug. In two minutes after the application of the Tobacco, the Bug was as dead as a Mackerel. Try it.

THE STATE JOURNAL.

THE WEEKLY STATE JOURNAL

Was established at Harrisburg to supply a want long felt in all parts of the State. No effort will be spared to make it an acceptable weekly visitor to the intelligent families of Pennsylvania. It will be devoted to Independent Journalism, will defend and advocate the rights and interests of the people and will assist every effort to advance the religious educational, moral and social condition of humanity. So long as the Republican party continues to be, as it now is, more than any other political organization, the enactor and defender of liberal and impartial laws, the protector of American Labor, the promotor of American Manufactures, and the leader in all great reforms, the Journal will advocate its principles and defend its policies.

The mining and manufacturing interests of the State, and the rights of the laboring men employed therein, shall always find favor in these columns. National and State measures proposed and enacted for the protection of American industry will ever be urged, advocated, and defended. The latest news, political, commercial, agricultural and social from all parts of the world, will be published weekly.

The proceedings of the Legislature throughout the session will be reported fully and promptly, so that the readers of the Journal may know what is transpiring at the State Capital. The Weekly Journal, like the Daily, is a first-class newspaper, thoroughly sound in politics, education, temperance and religion. It is a good agricultural paper, a good educational paper, a good temperance paper, a good religious paper, a good family newspaper.

The Journal is published by the "Harrisburg Printing Association," a corporation chartered by the Legislature, and composed of gentlemen of ample means, whose sole purpose is to publish a first class newspaper for Pennsylvania. The best talent and the ablest writers have been employed to conduct the affairs, and contribute to the columns of The Journal.

Send for specimen copies of Daily and Weekly.

The club rates have been placed low, so that all may secure the paper at the smallest possible cost.

Medical.

THE KIDNEYS.

---:o:---

The Kidneys are two in number, situated at the upper part of the lion, surrounded by fat, and consisting of three parts, viz: the Anterior, the Interior, and the Exterior.

The anterior absorbs. Interior consists of tissues or veins, which serve as a deposit for the urine and convey it to the exterior. The exterior is a conductor also, terminating in a single tube, and called the Ureter. The ureters are connected with the bladder.

The bladder is composed of various coverings or tissues, divided into parts, viz: the Upper, the Lower, the Nervous and the Mucous. The upper expels, the lower retains. Many have a desiae to urinate without the ability; others urinate without the ability to retain. This frequently occurs in children.

To cure these affections, we must bring into action the muscles, which are engaged in their various functions. If they are neglected, Gravel or Dropsy may ensue.

The reader must also be made aware, that however slight may be the attack, it is sure to effect the bodily health and mental powers, as our flesh and blood are supported from these sources.

Gout, or Rheumatism.—Pain occurring in the loins is indicative of the above diseases. They occur in persons disposed to acid stomach and chalky concretions.

The Gravel.—The gravel ensues from neglect or improper treatment of the kidneys. These organs being weak, the water is not expelled from the bladder, but allowed to remain; it becomes feverish, and sediment forms. It is from this deposit that the stone is formed, and gravel ensues.

Dropsy is a collection of water in some parts of the body, and bears different names, according to the parts affected, viz: when generally diffused over the body, it is called Anasarca; when of the abdomen, Ascites; when of the chest, Hydrothorax.

Treatment.—Helmbold's highly concentrated compound Extract Buchu is decidedly one of the best remedies for diseases of the bladder, kidneys, gravel, dropsical swellings, rheumatism and gout affections. Under this head we have arranged Dysuria, or difficulty and pain in passing water, Scanty Secretion, or small and frequent discharges of water; Strangury, or stopping of water; Hematuria, or bloody urine; Gout and Rheumatism of the kidneys, without any change in quantity, but increase in color, or dark water. It was always highly recommended by the late Dr. Physick, in these affections.

This medicine increases the power of digestion, and excites the absorbents into healty exercise by which the watery or calcareous depositions, and all unnatural enlargements, as well as pain and inflammation, are reduced, and it is taken by men, women and children. Directions for use and diet accompany.

Philadelphia, Pa., Feb. 25, 1867.

H. T. Helmbold, Druggist:

Dear Sir:—I have been a sufferer, for upward of twenty years, with gravel bladder and kidney affections, during which time I have used various medicinal preparations, and have been under the treatment of the most eminent Physicians, experiencing little relief.

Having seen your preparations extensively advertised, I consulted with my family physician in regard to using your Extract Buchu.

I did this because I had used all kinds of advertised remedies, and had found them worthless, and, some quite injurious; in fact, I despaired of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use your remedy. As you advertised that it was composed of buchu, cubebs and juniper berries, it occurred to me and my physician as an excellent combination, and, with his advice after an examination of the article and consulting again with the druggist, I concluded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bottle I was astonished and gratified at the beneficial effect, and after using it three weeks, was able to walk out. I felt much like writing you a full statement of my case at that time, but thought my improvement might only be a temporary, and therefore concluded to defer and see if it would effect a perfect cure, knowing then it would be of greater value to you, and more satisfactory to me.

I am now able to report that a cure is effected after using the remedy for fiive months.

I have not used any now for three months, and fell as well in all respects, as I ever did.

Your Buchu being devoid of any unpleasant taste and odor—a nice tonic and invigorator of the system. I do not mean to be without it whenever occasion may require its use in such affections.

M. McCORMICK.

Should any doubt Mr. McCormick's statement, he referms to the following gentlemen:

Hon. Wm. Bigler, ex-Governor, Pennsylvania.
Hon. Thos. B. Florence, Philadelphia.
Hon. J. C. Knox, Judge, Philadelphia.
Hon. J. S. Black, Judge, Philadelphia.
Hon. D. R. Porter, ex-Governor, Philadelphia.
Hon. Ellis Lewis, Judge, U. S. Court
Hon. G. W. Woodward, Judge, Philadelphia.
Hon. W. A. Porter, City Solicitor, Philadelphia.
Hon. John Bigler, ex-Govenor, California.
Hon. E. Banks, Auditor General, Washington. D. C., and many others, if necessary.

Sold by Druggist and Dealears everywhere. Beware of counterfeits. Ask for Helmbold's. Take no other. *Price*.—$1 25 per bottle, or 6 bottles for $6 50. Delivered to any address. Describe symptoms in all communications.

Address H. T. HELMBOLD, Drug and Chemical Warehouse, 594 Broadway, N. Y.

Miscellaneous.

THE NEW YORK TRIBUNE
1871.

Through struggle and suffering, at t of multiform agonies, bereavements, devastatio American Idea embodied in the preamble to our f Declaration of Independence approaches its comp alization. The noble, inspiring assertion that "all n created equal," and endowed by their Creator with able rights to life, liberty, and the pursuit of happi no longer a glittering generality, a poet's fancy, a opher's speculation, but the recognized base of our cal fabric. The benign Revolution, which dates fr Boston Massacre of 1770, finds its logical completio one century later, in the XVth Amendment, whicl to the equal political and civil rights of every man l naturalized in our Republic the shield and defense Federal Constitution. The billows of Caste and Pr may roar and rage around that rock, and may tran seem on the poin of washing it away: but its foun are deep laid and steadfast, and the breakers of Re and Slavery are hurled against and dash their spra t in vain.

We do not underrate the forces of Prejudice and A racy. We do not for et that a very large minoriy American People still hold in their inmost heart Blacks have no rights which Whites are bound to r We fully appreciate the desperation wherewith all tl ring elements of hatred to Republican achievement combined and hurled against the battlements of Re can ascendency of 1872. We do not doubt that loc cesses, facilitated by Republican feuds and dissensio inspire the charging host with a sanguine hope of v such as nerved it to put forth its utmost strength earlier stages of the constests of 1864 and 1868. Y faith is clear and strong that the American Peop bless God that, on the red battle-fields of our late War, the Union was upheld and Slavery destroye will never consciously decide that the precious bloo on poured out was lavished in vain.

The Tribune believes in the prosecution of th struggle by legitimate means to beneficent ends. T Sovereignty, it opposes indissoluble National Integr Slavery for Blacks, Liberty for All; to Proscriptic franchisement; to Popular Ignorance, Universal tion; to intensity and eternity of Wrathful Hate, un and invincible Good Will. It would fain do it utm hasten the glad day when the South shall vie w North in exultation and gratitude over the disappe of the last trace or taint of that spirit which impelle to exult in the ownership and chattelhood of his fello

Profoundly do we realized that the contest is ended—that Millions mourn, more or less public downfall of the Slaveholders' Confederacy, and rea children to hate those by whose valor and consta overthrow was achieved. If we ever seem to differ tially from other Republicans, our conviction that nimity is never weakness, that vengeance is never and that devils are not cast out by Beelzebub, must to explain alleged eccentricities whose perfect vindi we leave to Time and Reflection.

The Tribune has been, is, and must be, a zealou cate of Protection to Home Industry. Regarding h idleness as the greatest foe to human progress, the human happiness, we seek to win our countryn masses from the ensnaring lures of Speculation, of and of always overcrowded Professions, to the tr paths of Productive Industry. We would gladly d our overcrowded cities, where thousands vainly jost crowd in misguided quest of "Something to Do" to prairies and plains with colonies absorbed in Agric Mechanics and Manufactures, and constantly proj into the blank, void wilderness the homes and the of civilized Man. Holding the Protection of Home try by discriminating duties on imported Wares an rics essential to the rapid, beneficient diffusion of P tion in all its phases and departments, and so to t struction of our people in all the gainful arts of Pea urge our countrymen to adhere to and uphold that in undoubting faith that the true interest, not of a c a section, but of each section and every useful ci thereby subserved and promoted.

The Tribune aims to be preeminently a *Newspap* correspondents traverse every State, are present on important battle-field, are early advised of every n Cabinet decision, observe the proceedings of Congr Legislatures, and of Conventions, and report to us b graph all that seems of general interest. We hav for one day's momentous advices from Europe by far more than our entire receiptss for the issue in those advices reached our readers. If lavish outl sleeping vigilance, and unbounded faith in the lib and discernment of the reading public, will enable make a journal which has no superior in the acc variety, and freshness of its contents. The Tribun be such a journal.

To Agriculture and the subservient arts, we ha voted, and shall persistently devote, more mean space than any of our rivals. We aim to mak Weekly Tribune such a paper that no farmer can to do without, however widely his polities may diffe ours. Our reports of the Cattle, Horse, Produce an eral Markets, are so full and accurate, our essays in ation of the farmer's calling, and our regular rep the Farmers' Club and kindred gatherings, are so esting, that the poorest farmer will find therein a n suggestion and counsel, of which he cannot remain rant with positive and serious loss. We sell The W to Clubs for less than its value in dwellings for wa per, and, though its subscription is already very lar believe that a Half Million more farmers will take it ever it shall be commended to their attention. W our friends everywhere to aid us in so commending i

A GREAT MEDICAL DISCOVER

Dr. WALKER'S CALIFORNIA

VINEGAR BITTER

Hundreds of Thousands
Bear testimony to their Wonderful Curative Effects.

WHAT ARE THEY?

FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood, or at the turn of life, these Tonic Bitters have no [illegible] circular.

ing also, the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver, and all the Visceral Organs.

THEY ARE NOT A VILE

FANCY DRINK,

Made of Poor Rum, Whiskey, Proof Spiri and Refuse Liquors doctored, spiced and swe ened to please the taste, called "Tonics," "Appet ers," "Restorers," &c., that lead the tippler on drunkenness and ruin, but are a true Medicine, ma from the Native Roots and Herbs of California, fr from all Alcoholic Stimulants. They are t GREAT BLOOD PURIFIER and A LIF GIVING PRINCIPLE a perfect Renovator a Invigorator of the System, carrying off all poisono matter and restoring the blood to a healthy conditio No person can take these Bitters according to dir tion and remain long unwell.

$100 will be given for an incurable case, provid the bones are not destroyed by mineral poison other means, and the vital organs wasted beyond t point of repair.

For Inflammatory and Chronic Rheum tism and Gout, Dyspepsia, or Indigestic Billious, Remittent and Intermittent Feve Diseases of the Blood, Liver, Kidneys, a Bladder, these Bitters have been most succe ful. Such Diseases are caused by Vitiat Blood, which is generally produced by derangeme of the Digestive Organs.

DYSPEPSIA OR INDIGESTION, He ache, Pain in the Shoulders, Coughs, Tightness of t Chest, Dizziness, Sour Eructations of the Stomac Bad taste in the Mouth, Billious Attacks, Palpitati of the Heart, Inflammation of the Lungs, Pain in t regions of the Kidneys, and a hundred other painf symptoms, are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the to pid liver and bowels, which render them of unequall efficacy in cleansing the blood of all impurities, a imparting new life and vigor to the whole system.

FOR SKIN DISEASES, Eruptions, Tetter, Sa Rheum, Blotches, Spots, Pimples, Pustules, Boils, Ca buncles, Ring-Worms, Scald-Head, Sore Eyes, Erysi clas, Itch, Scurfs, Discolorations of the Skin, Humo and Diseases of the Skin, of whatever name or natu are literally dug up and carried out of the system in short time by the use of these Bitters. One bottle such cases will convince the most incredulous of the curative effect.

Cleanse the Vitiated Blood whenever you find i impurities bursting through the skin in Pimples, Eru tions or Sores; cleanse it when you find it obstructe and sluggish in the veins; cleanse it when it is fou and your feelings will tell you when. Keep the bloo pure and the health of the system will follow.

PIN, TAPE and other WORMS, lurking in th system of so many thousands, are effectually destro ed and removed. For full directions, read carefull the circular around each bottle, printed in four la guages—English, German, French and Spanish.
